

Submitter: Amy Stead

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB4141

Entertaining the idea of abolishing diesel usage in Oregon will have a major impact on all aspects of our economy-in a very negative way. How are the truckers going to deliver goods without being able to refuel.? Trains? Tractors harvest food? This will drive up prices even more when Oregon families are already feeling buried by the economy. Now is not the time-there is no infrastructure to accommodate the losses that will occur which will end up devastating our economy. Not everyone in Oregon lives in the Portland Metro area-please hear our voices as well and allow our citizenship the respect of equality within your institution.
