

Submitter: Brooke Miller

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB4141

The idea of banning most diesel fuel in Oregon does not make sense. It seems that it would only have a rather negative impact on the economy. It will burden industries like trucking and agriculture, industries the whole state relies on for goods and services to survive. This will drive up prices and place a burden on Oregon families who are already feeling burdened by the high costs of living in a poor economy. Now is not the time. The right infrastructure does not exist to accommodate the losses that will result from passing a bill like this. I respectfully ask that you hear our voices on this, that you truly consider the impacts it will have on the citizens of this state, and that you do not move forward with this decision that will hurt so many Oregon families.
