Committee: House Committee On Judiciary
Measure: HB4131

Kristin, Portland: I went downtown Summer 2020 when I heard that unwanted Federal Troupers were sent in. This was the night before Ted Wheeler came to get gassed, I believe, and just after. During both nights, I intended to learn to use my new night photography filter from far across the park when I was chased from over 200 meters from anyone straight into a crowd of professors being gassed. The 2 troupers ran and yelled at me, an unaffiliated bystander, and exploded something that lit up my bicycle.

The 2nd night the chemical weapons also were used in a crowd of people who were just playing music and dancing, which I got caught up in, and we were gassed with expired canisters that made us nauseated. I've got a photograph of the CM container, and of all the chemical dust in a tub used to wash off clothes that night. My menstruation has been irregular since then, going down to sometimes a 24 day cycle.
