

Submitter: Ralph House

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB4141

I am Ralph House and I oppose this bill that places restrictions on the sale of petroleum diesel. Please do not be short sighted and make a decision that will make an extremely small impact on the environment but will have an enormous negative impact on Oregon families, especially farm families. The burdens will be carried by those who neither asked for it or have the economic flexibility to compensate for it. It truly is treating a certain group of people as peasants.
