Committee: House Committee On Judiciary  
Measure: HB4131

People spent an entire summer peacefully protesting police brutality and murders. The only rioting was by racist cops who believe anyone left of center is a terrorist, who do not know the difference between violence and vandalism, and who deliberately declared "riots" when none were happening so they would have the excuse to deploy chemical weapons. These weapons harmed the people of Portland (including infants and children) whether or not they participated in the protests, destroyed its trees, are illegal to use under international law, and have caused long-term medical problems for people exposed to them.

If you pass this bill, you will be telling citizens that there is no point to peaceful protest and you will learn what riots are really like (if you need further warning, watch video from countries where they have learned that peaceful protests are useless and they attack and kill police). And, those riots are not going to result in some broken windows. They are going to end with politicians who do not listen to their constituents swinging from lamp posts or with their heads on spikes.
