

Submitter: Benjami Williams
On Behalf Of:
Committee: House Committee On Housing
Measure: HB4118

We urge opposition to this bill and its amendments, because:

- These UGB expansions will be driven by individual private landowners, not a public process.
- HB 4118 would override the community process by which urban reserves were originally designated.
- Urban reserve areas often contain substantial expanses of farmland, in addition to forests and natural areas which will be put at risk.
- The covenant contemplated by HB 4118 creates a new structure that makes it unlikely it can even deliver on what it promises.
- The required provision of necessary urban services within two years of approval is very unlikely to occur and will create unforeseen complications for land use planning in the future.
