

Submitter: ERIN KARBOWSKI
On Behalf Of: Fca
Committee: Senate Committee On Education
Measure: SB1552

My name is Erin karbowski I have had children enrolled in fca since before the pandemic due to health and behavior reasons. Fca has been a life saver my kids are more comfortable and look forward to their classes. The teachers are attentive and supportive. I feel that my kids get the individual attention they need when they need it. I am comfortable knowing my kids are safe in their own home and still getting the education they need. We hope that we are able to keep our children at fca virtual school vs sending them to a school building where they are exposed to things outside of our control.
