

Submitter: Korie Bartnik
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB1552

Traditional brick and mortar public school is not the best option for many students. My son, who is 2E (twice exceptional-meaning he has both learning disabilities and is intellectually gifted), was withering in the traditional setting but has earned excellent grades and is set to graduate this June, a year early, after attending a virtual public charter school (Frontier Charter Academy) since 7th grade. For any student to not have the opportunity he had because of a requirement not related to best meeting their need isn't fair nor is it in the public interest. Please support SB 1552 and allow all students to choose how to best meet their educational needs.
