

Submitter: David Klaus

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB4141

I am in strong opposition to this bill as it will impact those who can least afford it like farmers and ranchers, and small trucking and delivery companies. This is simply another move to destroy the fossil fuel industry and the inexpensive and efficient energy it brings us. Contrary to the prevailing narrative, there is no "climate emergency" and therefore no reason to phase out diesel fuel.
