

Submitter: Karen Spurlin

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB4141

I strongly urge a NO vote on HB4141. This would cripple agriculture in Oregon and would be the end of many small farms that can't afford to replace their machinery that runs on diesel. There has been no thought as to the impact this would have on Oregon's largest export industry and the lives of those that would be affected. We, the farmers, are constantly bombarded with ridiculous bills such as this one and it needs to stop. This a bad bill and should be a resounding no vote.
