

Submitter: Diana Richardson

On Behalf Of:

Committee: House Committee On Environment and Natural Resources

Measure: SB1589

In the name of the Earth, The River and the hundreds of thousands of beings which live in, on or near the River and therefore rely upon its maximum stability for their well-being, I support this legislation which will limit the damage continually and repeatedly being done by the creation of artificial waves which damage the shore and its denizens. We do not even know the full extent of this damage because it is immeasurable; not a thing we can completely measure.

Please look into this matter thus and in your own heart. And pass this bill, which undoubtedly does not go far enough. Thank you, Diana Richardson, Portland, OR
