

Submitter: Susan Morse

On Behalf Of:

Committee: House Committee On Environment and Natural Resources

Measure: SB1589

Responsible water and wildlife conservation starts by limiting the impact of residential development on our water ways. This is not done by the stroke of a pen but by through science and responsible stewardship of our fisheries. Borrowing rules from private water ways and imposing them on public water ways is not responsible leadership and will have a dramatic negative impact on families who enjoy water sports as a healthy and safe recreation. Keep the Newberg Pool OPEN!
