

Submitter: Rocky Wardle

On Behalf Of:

Committee: House Committee On Economic Recovery and Prosperity

Measure: SB1564

I would like to suggest that instead of placing a moratorium, put limits as to the number of acres, as in 2 acres or a maximum of 25,000 square foot of green houses, that can be planted per tax lot. Many small farmers will be eliminated from making any money on his property this year if this moratorium is passed in current form. Many small farmers have purchased growing supplies for this season and it would be devastating if they are unable to plant this season. A little is better than nothing.
