Submitter: Susan Cater

On Behalf Of:

Committee: Senate Committee On Rules

Measure: HB4133

I strongly oppose this bill. Our Social Security numbers should NOT be used for anything except SS benefits. It was NEVER designed to be used as identification. Once a person submits their "last four", one risks compromising the number to a miriad of scammers out there. We know since 2018 more than 35 million numbers have been compromised. It is not difficult to get a State-issued I.D. even if one does not drive. This bill opens our election system up to even more voter fraud than already exists. I know people are getting multiple ballots, my last manager shared that his daughter got 3 ballots; I've even seen posts on Next Door that people are getting multiple ballots. How many do not say anything and vote them?
