

Submitter: Virginia R Hall  
On Behalf Of:  
Committee: Senate Committee On Rules  
Measure: HB4133

#### VOTE NO HB 4133

MORE INSECURE VOTING METHODS BASED ON INSECURE DATA WON'T RESULT IN ELECTION INTEGRITY BEING ACCOMPLISHED. "millions of Social Security numbers were exposed to criminals. The hackers successfully stole large amounts of data about T-Mobile customers including names, birth dates, Social Security numbers, and driver's license information. Furthermore, approximately, 850,000 prepaid customers had their names, phone numbers, and account PINs exposed according to the company.

"With Cybercrime and phone and internet scams becoming more and more common, it's reasonable to worry and question how this can affect you financially. Stolen Social Security numbers can be used by criminals to open credit card accounts. They may also use them to divert or fraudulently collect benefits. Stolen Social Security information is a tool for criminals to commit various forms of identity theft." AND NOW YOU WANT CRIMINALS TO USE THEM TO VOTE--AND INCREASE THEIR VALUE ON THE BLACK MARKET. WHERE'S THE INTEGRITY IN THAT? EVEN A F-B ILLITERATE GRANDMA CAN FIGURE THAT OUT !!!

#### Personal Choice and Responsibility

By allowing third-party organizations to submit registration cards electronically on behalf of individuals, they are removing the personal choice and responsibility of those persons to control their voter registration. Mistakes will happen due to this third-party process.

#### Fiscal Responsibility

Money should not be used to develop or conduct this process as it removes the rights of the individual to self determine their election rights and responsibilities. Voting is a fundamental right that should be handled best by the voter. Potential Fraud is real.

#### Limited Government

The voter, not the government should be in control of their own voter registration record.

#### Local Control

State issued Drivers Licenses and ID cards at least insure that the person is registered as an Oregonian and presented themselves in person at a DMV. Social Security numbers do not provide any evidence of Oregon residency. This further

weakens Oregon voter rolls for accuracy.

VOTE NO ON HB 4133 !!!
