

Submitter: Jessica Taylor
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB1552

I strongly support SB 1552, as it will increase educational options for students of all backgrounds. It allows students to pursue individualized education options that better fit their needs. Many Oregon families are frustrated with limited choices for their children's education. Charter schools are better supported in other states and some people are leaving this state based on the limited options. Let's improve education in Oregon by not limiting families' choices for their children's education. This bill also helps improve equitable access and could improve the achievement gap. I urge you to pass Senate Bill 1552.
