

I oppose HB4002. This bill will absolutely kill small farmers and ranchers that need seasonal help. Our profit margins are low. We are controlled by weather and market prices and to require overtime pay during our peak harvest would virtually eliminate any profit. We have no control over world markets that impact our fuel and fertilizer costs; let alone inflation. This is biting the hand that feeds you and stressing or eliminating the farm to table movement.

We cannot vote ourselves a double salary increase like you.
