A Whole-of-State Approach
to Cybersecurity, North Carolina

— Improving the Security Posture of Local
Health Departments, Indiana

The Challenge

TANIUM
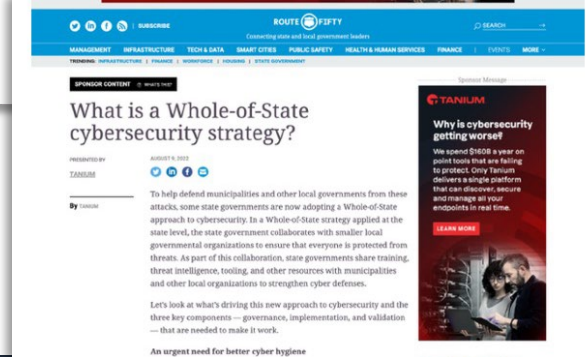

Current State of Cybersecurity Across States

Lack of coordination	**Lack of visibility**	**Lack of governance**	**Ineffective implementation and validation**

TANIUM.

The Result

❖ Increased costs to protect

❖ Gaps in protection

❖ Failure to maximize resources

❖ Tools that don't integrate

❖ Slower response to incidents

❖ Constituent services and data are at risk.

Whole of State Approach to Cybersecurity

Whole of state Is

- ❖ A cybersecurity strategy between multiple levels of government – State, Cities, Counties, K12s, and tribes

- ❖ Coordination and standardization of governance, implementation, and validation

- ❖ Combining resources to find better ways to share information, respond to incidents, address workforce challenges, and standardize tool solutions

Policy, Funding, Support

Information Sharing

- ISAC/ISAO
- Communication Platform

Incident Response

- Cyber Reserves
- Regional SOCs
- National Guard
- Fusion Centers

Workforce Development

- Virtual CISO
- K-12 and Higher Ed Programs
- Internships

Standardized Tools

- Cyber Assessments
- Security Awareness Training
- Information Sharing Platform
- Future needs aligning to NIST/CIS

Governance, Implementation, Validation

TANIUM

National Whole of State Initiatives

Whole of State – Regionally/Nationally

- Indiana
  - Governance, resources, Info Sharing, Incident Response
- New York
  - Cyber Command Office
- North Carolina
  - Governance, information sharing, incidence response
- North Dakota
  - Information Sharing
- Oklahoma
  - Cybersecurity Grant Program
- Pennsylvania
  - Information sharing and Security Awareness training
- Texas
  - Regional SOCs

- NGA – 38 Governor's Sign Whole of State Compact
- NASCIO – 2022 Positive Trends
- CIS – Why Whole of State is the Way Forward
- NACO – Whole of State and the Arizona Experience
