

GLASS TO GLASS RECLAMATION TECHNOLOGY

Upcycled Glass Fiber

Carbon Rivers LLC is excited to provide the first technology to fully upcycle wind turbine blades for a truly circular, sustainable glass fiber economy.

We have partnered with the Department of Energy and commercialized our technology so turbine blades will never have to be landfilled, and our upcycled glass fiber goes immediately into next-generation wind turbine manufacturing.

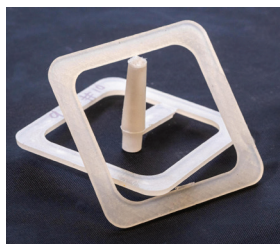

Upcycled shredded glass fiber

Upcycled glass fiber pellets

Upcycled glass fiber wet-laid mat

Compounded injection molding-grade rGF-PP pellets
