General Fund		
Personal Services	\$203,384	\$0
Services and Supplies	\$33,688	\$0
Total General Fund	\$237,072	\$0
Total Fiscal Impact	\$237,072	\$0
<i>Total Positions</i>	1	0
<i>Total FTE</i>	0.88	0.00

Analysis:

SB 931 - A4 permits the Environmental Quality Commission to adopt rules to determine whether a community or area-wide sewerage system is available. Rules must consider the legal availability and physical availability of a sewerage system; the scope and magnitude of the proposed repairs to an existing subsurface sewage disposal system or alternative sewage disposal system; the cost of repairs to an existing system compared to the cost of connecting to a sewerage system; statewide planning goals; and environmental and public health concerns associated with the proximity of seepage pits, cesspools or drain fields to wells or water. This is operative January 1, 2024.

The Department of Environmental Quality (DEQ), until January 2, 2025, may not determine that a community or area-wide sewerage system is available unless the sewerage system is within 200 feet of the property to be served. The measure takes effect on the 91st day after the legislature adjourns sine die.

DEQ would hire one limited duration, full time Operations and Policy Analyst 3 (0.88 FTE) to assist with the rulemaking required under this measure, and provide training and technical assistance to county staff and other stakeholders, at a cost of \$237,072 General Fund.
