

From the Desk of Representative Rob Nosse

The American College of  
Obstetricians and Gynecologists  
WOMEN'S HEALTH CARE PHYSICIANS

April 30, 2023

As Oregon’s health care and future health care providers, it is our obligation to support the health, safety and well-being of our patients. The care we provide is always grounded in the highest ethical and evidence-based standard of care.

Right now, across the United States, the ability of individuals to access necessary and life-saving health care is in jeopardy. Restrictions and outright bans on reproductive and gender-affirming care put far too many patients at risk. And for the dedicated medical professionals like us who work tirelessly to provide this care to those in need, these efforts threaten that care.

House Bill 2002 takes a vital step towards protecting Oregon providers from extreme legislation that would criminalize the work we do to provide medically necessary care and save lives. This bill also ensures those patients in need of reproductive health care and gender-affirming health care continue to have access.

We urge your support for House Bill 2002.
