

## SB 634 STAFF MEASURE SUMMARY

### Senate Committee On Natural Resources

---

**Action Date:** 03/01/23

**Action:** Do pass and refer to Ways and Means by prior reference.

**Vote:** 5-0-0-0

**Yeas:** 5 - Girod, Golden, Prozanski, Smith DB, Taylor

**Fiscal:** Fiscal impact issued

**Revenue:** Revenue impact issued

**Prepared By:** Laura Kentnesse, LPRO Analyst

**Meeting Dates:** 2/13, 3/1

---

#### WHAT THE MEASURE DOES:

Authorizes issuance of lottery bonds in an amount that nets \$15 million for deposit in the Levee Project Grant Fund, to be used for investigating the adequacy of levees and improving levees so they can be certified and accredited. Requires lottery bonds be issued no later than June 30, 2024. Establishes legislative findings related to the benefits of this use of lottery bond proceeds. Declares emergency, effective July 1, 2023.

#### ISSUES DISCUSSED:

- Prevalence of aging levee infrastructure in urban and rural Oregon
- Federal requirements for levee safety standards
- Prioritization of levee project assistance for rural and distressed areas
- Capital construction subcommittee process for projects requesting lottery funds

#### EFFECT OF AMENDMENT:

No amendment.

#### BACKGROUND:

Levees are human-made structures that are designed to control or divert water flow and reduce the risk of flooding and associated impacts to the built environment. They can be made from concrete, steel, or compacted earth, and protect large cities and small rural communities alike.

Most levees are locally owned and maintained. The Federal Emergency Management Agency sets safety standards for levees, which must be met in order to receive and maintain accreditation to qualify for the national flood insurance program. As those standards have become more rigorous post-Hurricane Katrina, many aging Oregon levees are at risk of having federal accreditation revoked.

In 2015, the Legislative Assembly created a financial assistance program for levee projects, and directed the Oregon Infrastructure Finance Authority to provide grants and loans to drainage districts, for-profit entities, nonprofits, and individuals engaged in the ownership, construction, inspection, accreditation, certification, or repair of levees. In 2019, the Legislative Assembly established the Levee Project Grant Fund through House Bill 5030, authorizing \$15 million in lottery bonds for levee projects. Grants from the fund are limited to \$2 million maximum per grant applicant per biennium for planning projects; may not exceed 80 percent of the total project cost for construction or capital improvement projects; may not be awarded unless the applicant pledges at least 20 percent matching funds; and at least 60 percent of the grants must be used to provide levee project assistance to rural or distressed areas of the state. In 2021, the Legislative Assembly enacted House Bill 5006, approving \$15 million for additional levee project grants.

Senate Bill 634 would authorize issuance of lottery bonds in an amount that nets \$15 million for deposit in the Levee Project Grant Fund, to be used for investigating the adequacy of levees and improving levees.
