9 **conservation measure the present value of a reduction in costs to a**
10 **contracting agency associated with energy use in a public improve-**
11 **ment is greater than the net present value, discounted at the cost of**

4 tracting agency and a qualified energy service company that:

5 “(A) Allocates responsibilities between the contracting agency and
6 the qualified energy service company for achieving specific energy
7 savings or performance from an energy conservation measure in a
8 public improvement; and

9 “(B) Provides remedies to a contracting agency, including damages
10 and appropriate equitable relief, if an energy conservation measure the
11 qualified energy service company identifies, evaluates, recommends,
12 designs, constructs or installs for or in a public improvement fails to
13 achieve the energy savings or performance specified in an energy
14 savings performance contract.

15 “(d) ‘Qualified energy service company’ means a person that:

16 “(A) Has demonstrated a technical, operational, financial and
17 managerial capability for, and a prior record of success in, identifying,
18 evaluating, recommending, designing and constructing or installing
19 an energy conservation measure;

20 “(B) Has developed expertise in measuring and verifying energy use
21 and reductions in energy use in buildings and other structures; and

22 “(C) Has prequalified with the State Department of Energy as pro-
23 vided under rules the department adopts under ORS 276.915.

12 **“(c) Provide that the contracting agency may purchase or finance**
13 **an energy conservation measure as provided in paragraph (a) of this**
14 **subsection if the utility cost savings that will result from the energy**
15 **conservation measure is sufficient to pay, within the useful life of the**
16 **energy conservation measure, the cost of the energy conservation**
17 **measure and the costs of financing the energy conservation measure;**
18 **“(d) Provide that a contracting agency may finance the costs of all**
19 **energy conservation measures for a public improvement as provided**

15 state-owned buildings. At a minimum, the assessments must:

16 “(A) Examine and quantify each building’s greenhouse gas emis-
17 sions, using where feasible existing data such as energy use reporting
18 for existing state-owned buildings that state agencies submitted to the
19 State Department of Energy and data from other existing programs
