

Submitter: Pamela Burnor

On Behalf Of:

Committee: House Committee On Rules

Measure: HB3414

The City of Corvallis infrastructure cannot support existing homes and businesses. Police and Fire services are pushed to the limit. Building into the wildland urban interface is causing the entire city to be at greater risk of wild fire but there are no funds to address this risk. Current building codes have not caught up with the impact of climate change. Rash decisions to allow developers to build beyond the urban boundaries is a bad idea.
