

Submitter: Harlan Borow

On Behalf Of:

Committee: House Committee On Rules

Measure: HB3414

Please support HB3414-17! We need more land to build homes to reduce the short lot supply and bring land costs down. This is critical to a pathway to more affordable housing and HB3414-17 will make the process for needed expansions of urban growth boundaries into existing urban reserves more streamlined and efficient, for large and small cities with housing needs. Please support HB3414-17 to help bring down the cost of housing, along with any other measures to reduce permitting and SDC costs.
