

Submitter: Erin Kenzie  
On Behalf Of:  
Committee: Senate Committee On Rules  
Measure: HB3031

As a parent in Oregon and a public health professional, I wholeheartedly support HB 3031. Clean air in schools has many benefits, including improved academic performance and reduced spread of communicable illness. Requiring school districts to monitor air quality is the first step to improving air quality, as it is difficult to change what you don't measure. Requiring HVAC improvements would make a measurable impact for children in our schools. Please pass this bill!
