

Submitter: Calista Songstad

On Behalf Of:

Committee: Senate Committee On Rules

Measure: HB2107

I oppose this bill. Oregon has experienced trouble with proper registration through DMV, which has now had a massive cyber security breach. Voter Registration information should be treated at the same high clearance level that social security information and banking information is. It is a terrible idea to continue to get more agencies involved that are less trained in this particular matter. Vote no and save the state some money to work on the platform we already have.
