

Submitter: William Prusinski
On Behalf Of:
Committee: Senate Committee On Rules
Measure: HB2004

Support freedom and support ranked choice voting! This system of voting would expand participation in exercising the civil liberty of voting for governing officials. By allowing more people to vote affirmatively for the candidate they most support and ranking the next-most desirable options, everyone's vote matters and support for political candidates can be expressed without fear of a "wasted" or "spoiler" vote. This increases the range of opinions expressed and moves towards more accurate governance according to the held beliefs of each voting individual. As our elected representatives you have an obligation to improve on the voting process whenever possible, so pass Bill HB 2004 now! Thank you.
