

Submitter: Dan and Janet Blair

On Behalf Of:

Committee: Senate Committee On Rules

Measure: HB2004

We support ranked choice voting as a way to more equitably gauge the support of voters for any particular candidates in very important elective offices. Admittedly, it might make vote counting a bit more cumbersome, but we think it is the best way to avoid a number of candidates running for the same office from ending up splitting the vote and someone who is not the one wanted by a majority of the voters could squeak through and win. We ask you to give our recommendation your most serious and thoughtful consideration. Thank you.
