Submitter: Andrew Seles

On Behalf Of:

Committee: Senate Committee On Rules

Measure: HB2107

Oregon's Automatic Voter Registration has created a convenient, secure way for more Oregonians to
register to vote. Twenty-one other states have passed similar efficient programs that integrate
systems and information between government agencies, saving time and minimizing human error,
However, not everyone interacts with the DMV, so it makes sense to extend "Motor Voter" to other
government agencies that engage with large numbers of unregistered voters like Oregon's Health Authority.
I strongly support this initiative.
