Submitter: Steve Ingham

On Behalf Of:

Committee: Senate Committee On Rules

Measure: HB2004

There is a video created in 2018 by the State of Maine
(https://www.youtube.com/watch?v=xcGGH7E_vNk) explaining how Ranked Choice
Voting (RCV) will work in Maine elections. In their sample data to explain the
complicated process, it was clearly shown that the winner had a minority of votes for
her but a majority of votes against her and she still won the election! That a sample
election could easily demonstrate this weakness in RCV is alarming to me. I do not
want Ranked Choice Voting anywhere in the state.

I easily can foretell that more people would become disenfranchised because of the
complexity of RCV.

Please Vote no!
