

Submitter: Conan Fuerte
On Behalf Of: Self
Committee: Senate Committee On Rules
Measure: HB2004

Rank choice voting is not an accurate, nor legitimate means of conducting an election. The very fact such a means and method being proposed, speaks more so of the nefarious intellect willing to subvert a less comprehending voter. By the means of 'gaming' - e.g. like a street hustle- of what should be a single ballot, single vote of a singular candidate, per elected office, per registered voter.
