

Submitter: Kevin Hoar
On Behalf Of:
Committee: Senate Committee On Rules
Measure: HB3409

The only hearing the Senate on this far-reaching 112-page Gut & Stuff bill consisted of 3 pieces of written testimony, a very short live hearing with almost no public notice, and virtually no public scrutiny. It is unforgivable that the process and public debate over this bill have been so flawed. There is no way this will meet the public's expectation of transparency as we get slammed by the wrecking ball to our energy choice, reliability, and affordability. Dump this bill and restore the public's right to hear what is going to be done to them by the people claiming to represent their best interests. More than 2/3rd in a recent poll oppose the types to bans and limits on energy choice you are sneaking through.
