

Submitter: Donna Bleiler

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2278

I strongly oppose.

This bill authorizes pharmacists to administer vaccine to persons six months of age or older.

There doesn't appear to be anything in this bill that limits the administration of vaccines to influenza. There is worldwide controversy concerning vaccines including influenza and covid that shouldn't be administered without the approval of a physician with medical history. Study shows flu vaccines can be associated with an increased long-term risk of diabetes in both rodents and humans.

It is your duty to protect our children.
