

Submitter: Keith Hill
On Behalf Of: David Nichols
Committee: Senate Committee On Human Services
Measure: SB420

As a health care provider I am appalled at the lack of information and support in the health care system in Oregon. Having recently lost my father I found getting information out of the system was insanely difficult. The rules and standards of care are not available in any place that can be accessed and to the non industry person it is extremely intimidating and frustrating. Providing a system for the traumatized, both patient and their families is long overdue. Please put a priority in the passage of this much needed law. Thank you, Dr. Keith Hill
