

Submitter: David Booth

On Behalf  
Of:

Committee: House Committee On Agriculture, Land Use, Natural Resources, and  
Water

Measure: HB2616

Dear Chair Helm, Vice-Chairs Hartman and Owens, and members of the committee,

My name is David Booth and I'm excited to write in support of HB 2616.

As a responsible consumer and advocate I want to make sure that Oregon's dairy industry follows the best possible standards across the board, especially around raw milk. Unfortunately, Oregon's raw milk regulations are falling behind — it is time to revisit and upgrade our outdated raw milk laws.

For years I struggled to find any raw milk source and even resorted to driving all the way to Vancouver! I finally found Cast Iron Farm about ten years ago I have enjoyed my daily raw milk ever since. I find it helps greatly with allergies to the point of never having congestion of any kind. It is my most expensive food item by far on my limited retirement income and I consider it money very well spent. Every time I pick up milk I can see for myself the wonderful cows and their healthy environment.

If passed, HB 2616 will ensure that Oregon producers are able to meet the growing demands for raw milk in our state safely and effectively, by implementing nationally-recognized testing, safety and risk mitigation measures and giving cow dairies the same opportunities that goat and sheep dairies already have.

For licensed dairies, raw cow's milk is currently off the table. Oregon allows the retail sale of raw milk from sheep and goats, but not from cows — no other state makes this distinction in the retail market. It's time to fix this discrepancy and improve the safety, testing and training standards for raw milk production across the board — whether you're milking goats, sheep or cows.

For smaller licensed-exempt producers, HB 2616 offers critical upgrades as well. If passed, this legislation will give small cow dairies new possibilities to grow, expand their business and reach more consumers in this growing industry. HB 2616 will also allow small producers more flexibility in how they get their products to their consumers — eliminating the burdensome requirement that sales transactions take place on-site. These small, common-sense upgrades will help both Oregon's farmers and the customers they serve.

I am thrilled to see this bill before your committee. If passed, this bill will help more farmers to become raw dairy milk producers so my friends can also get raw milk like I

can. At present there are few options around the state and I bet many have a long waiting list.

Oregon's raw milk policies are out of date and it's time for a change. This legislation will raise the raw milk standards in Oregon and ensure better transparency, access and accountability across the board.

I urge your support for HB 2616.

Thank you,

David Booth
