

Submitter: Miriam N

On Behalf Of:

Committee: House Committee On Early Childhood and Human Services

Measure: HB2495

Healthcare is important to the community. Things are much more expensive post COVID. Food costs more, it's costing more to keep staff. Housing is much more expensive. Providers will not break even if this bill passes. AFH are a great addition to the community, they provide specialized care to their complex patients. The patients are all different and their pay can not be standard. I oppose this bill.
