

Submitter: Michael Brinster

On Behalf
Of:

Committee: House Committee On Agriculture, Land Use, Natural Resources, and
Water

Measure: HB2616

Citizens of this state and country face a terrible epidemic of chronic disease, caused in large part by highly-processed industrial junk food that is so prevalent just about everywhere you look. That is where the danger is. It is not from highly nutrient-dense, natural foods such as unpasteurized ("raw") dairy products offered by local, responsible and highly skilled purveyors. Please stop this backwards regulatory madness and give people who care about their health the freedom to access these incredible foods and support local farmers and businesses at the same time. Please vote in support of HB 2616.
