

Public testimony

Raw Milk has been safe for me since 1950 and I was ten, when I drank lots of it in my teen years in Maine. Now in Oregon I have been drinking raw milk from a local farm and would like you to support the sale of it as in the bill. There are many nutrients my body would **not** have received if I only drank milk that has boiled all the nutrients out of it....in the pasteurization process. Thank you for your support....
