

Submitter: Sarah Kester

On Behalf Of:

Committee: House Committee On Education

Measure: HB2281

I support this legislation as it is important for all students in Oregon to be protected from discrimination and harassment.

The fight for civil rights doesn't have an invisible finish line. Students and faculty should be free from discrimination in school, assigning someone to investigate these issues on a local level makes sense. This lightens the load from other areas in the district.

I urge you to vote in favor of HB 2281
