

Submitter: Hannah Kraft

On Behalf  
Of:

Committee: House Committee On Agriculture, Land Use, Natural Resources, and  
Water

Measure: HB2616

Hi! My name is Hannah Kraft and I am writing this letter in support of HB2616. Raw milk is known for its high values in vitamins, minerals, protein and good fats! Majority of these good nutrients get killed off during the pasteurization process leaving little nutrients in the milk. Raw milk has been proven to increase the immune system, aid in allergies and easier to digest in the body. From a personal experience, my son who has bad asthma, has highly benefited from drinking raw milk. It not only gives him lots of good nutrients but has also helped with his flare ups. I am so grateful to have this option for him.

I also love being able to support my local farms in this way as well! I urge your support for HB 2616.

Thank you again for your time!
