Of:

Committee: House Committee On Agriculture, Land Use, Natural Resources, and
Water

Measure: HB2616

Dear Chair Helm, Vice-Chairs Hartman and Owens, and members of the committee,

My name is Aaron Estoup and I'm excited to write in support of HB 2616.

As a responsible consumer I want to make sure that Oregon's dairy industry follows the best possible standards across the board, especially around raw milk.

Unfortunately, Oregon's raw milk regulations are falling behind — it is time to revisit and upgrade our outdated raw milk laws.

I have personally shifted to drinking raw milk and the benefits are astronomical. Pasteurized milk scientifically has almost no benefits, and with the addition of sugars and other byproducts it has almost become a negative. Raw milk with the correct protocols can be a superfood.

If passed, HB 2616 will ensure that Oregon producers are able to meet the growing demands for raw milk in our state safely and effectively, by implementing nationally-recognized testing, safety and risk mitigation measures and giving cow dairies the same opportunities that goat and sheep dairies already have.

For licensed dairies, raw cow's milk is currently off the table. Oregon allows the retail sale of raw milk from sheep and goats, but not from cows — no other state makes this distinction in the retail market. It's time to fix this discrepancy and improve the safety, testing and training standards for raw milk production across the board — whether you're milking goats, sheep or cows.

For smaller licensed-exempt producers, HB 2616 offers critical upgrades as well. If passed, this legislation will give small cow dairies new possibilities to grow, expand their business and reach more consumers in this growing industry. HB 2616 will also allow small
