

Submitter: Jeremy David

On Behalf
Of:

Committee: House Committee On Agriculture, Land Use, Natural Resources, and
Water

Measure: HB2616

Dear Chair Helm, Vice-Chairs Hartman and Owens, and members of the committee,

My name is Jeremy Hyland and I'm excited to write in support of HB 2616.

As a responsible farmer and producer and I want to make sure that Oregon's dairy industry follows the best possible standards across the board, especially around raw milk. Unfortunately, Oregon's raw milk regulations are falling behind — it is time to revisit and upgrade our outdated raw milk laws.

I have been in the farming and food service/production profession for 19 years. The ability to produce and sell raw milk would greatly benefit me and my customers. It would give me a strong market which would economically benefit me. Also, having resources to insure our raw milk is of the highest quality and safety helps keep raw milk drinkers safe. As a cheesemaker, I can say that access to raw milk is a big limitation for those wishing to make raw milk cheeses, which are currently legal to produce. More farmers with licensed raw milk means more cheesemakers have access to the ingredients they need, further stimulating the fantastic cheese culture of Oregon.

If passed, HB 2616 will ensure that Oregon producers are able to meet the growing demands for raw milk in our state safely and effectively, by implementing nationally-recognized testing, safety and risk mitigation measures and giving cow dairies the same opportunities that goat and sheep dairies already have.

For licensed dairies, raw cow's milk is currently off the table. Oregon allows the retail sale of raw milk from sheep and goats, but not from cows — no other state makes this distinction in the retail market. It's time to fix this discrepancy and improve the safety, testing and training standards for raw milk production across the board — whether you're milking goats, sheep or cows.

For smaller licensed-exempt producers, HB 2616 offers critical upgrades as well. If passed, this legislation will give small cow dairies new possibilities to grow, expand their business and reach more consumers in this growing industry. HB 2616 will also allow small producers more flexibility in how they get their products to their consumers — eliminating the burdensome requirement that sales transactions take place on-site. These small, common-sense upgrades will help both Oregon's farmers and the customers they serve.

As a producer myself, I am thrilled to see this bill before your committee. If passed, this bill will help me grow my market and make the best use of my land.

Oregon's raw milk policies are out of date and it's time for a change. This legislation will raise the raw milk standards in Oregon and ensure better transparency, access and accountability across the board.

I urge your support for HB 2616.

Thank you,

Jeremy Hyland
