On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB2714

As seen in other cities like Denver, the potential benefits of a rebate for e-bikes is massive. E bikes provide benefits in the form of reduced carbon emissions and are also beneficial in lowered transportation costs. Lower transportation costs are even more vital for low income households that often can't actually afford an e bike. This would also be great for local shops selling ebikes. Our household has one e bike and this incentive would allow us to buy a second further reducing our need to use a vehicle for trips.
