

Submitter: Gary Field

On Behalf Of:

Committee: Senate Committee On Housing and Development

Measure: SB799

Once again government is interfering with a private activity , government expects someone else to shoulder the burden of perceived problems in the rental community when they them selfs have never been involved in a rental property business.

Will government support landlords when they start to fail because of the legislation they passed, that almost always destroys private enterprise.

I do not support SB 799.

Oregon is in a housing crisis and this legislation if passed will only make the issues worse.

Gary
