

Submitter: Claire Rivers

On Behalf Of:

Committee: Senate Committee On Finance and Revenue

Measure: SB541

You can't make money off products or processes that cause harm. Products that cause harm have a "hidden" cost which is that of recovering from that harm--lawsuits, restitution, environmental clean-up, health care costs, ect. The long-term costs of harm are, literally, inexhaustible. It is therefore unconscionable not to incorporate human rights analyses into investment decisions.
