

Submitter: Calista Songstad

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB713

Please vote Aye,

Being able to better direct our water to the living things that depend on it, is a very necessary strategy to implement in Oregon. There are many places where rain and snow fall on roofs and concrete driveways that water would do more good to be collected and delivered to dependent vegetation that prevents fire hazards and keeps our communities fed.
