

Submitter: Christina Anderson
On Behalf Of:
Committee: House Committee On Rules
Measure: HJR5

Freedom of the Press, Freedom of Speech are Rights but some areas of life in the USA are privileges and should always remain as such. As we face severe population challenges, climate crisis and all that brings to our environment, it would be dangerous to create a constitutional right, to hunt, fish, harvest wildlife and gather wild foods etc. Where does this right leave us in the future when wildlife and habitat are highly endangered from over use, over hunting and all the climate changes we are facing. I encourage lawmakers to leave the Oregon constitutional as it is written. Let all Oregonians live a life of privilege, unless abusing, taking for granted, then let the consequences. Oregonians must know we respect our land, our privileges and our constitution and will take those privileges away if not dually respected by all. This is our power to protect all ways of life here in the Majestic Oregon landscape.
Thank you Christina Anderson
