

Submitter: Chelsea Boppre
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB767

My child is a talented softball player and her schedule does not allow her to attend a typical in person school without missing a lot of classes. Her and her brother currently attend a "virtual" charter school. We left our local school before the shutdowns because of the lack of education in our neighborhood school, she was ahead and typically spent 75% of her day bored in front of a Chromebook. With her current charter school she's excelling academically and able to play the sport she loves without compromising either.

I'd encourage you to stop SB 767 before it goes further. After our great experience with this virtual charter our children will not return to our local school. If this passes our family would homeschool without the teacher support and numerous resources we receive from the virtual public charter school.

This SB is a disservice to families in Oregon.
