Committee: House Committee On Rules

Measure: HJR5

This bill is very important to me and my family. Getting outdoors as well as getting my kids outdoors is a top priority. In this day and age, kids are getting too much screen time. I try to get them outside as much as possible and hunting, fishing and picking mushrooms is a big part of that. My son will never forget the time we had a successful hunt a few years ago. Neither will I. It is such a great bonding experience and tradition. The sustainable, healthy food source that comes along with the life lessons of our adventures is a bonus. I support this bill in hopes that my kids can carry on the tradition and love for the outdoors to their future children!
